

Company Snapshot June 2025

The giants of business know this: money doesn't talk — until you listen to it. Meet a fintech stack that stimulates **small businesses** with enterprise-level intelligence and global reach.

We've built AI-driven tools that empower small and medium-sized businesses with real-time, actionable insights—enabling them to talk and think with their data from multiple sources (like QuickBooks and Shopify) at once.

Our platform is designed to operate up to **100 times faster, smarter, and more reliably than a human**, helping SMBs make better decisions, optimize payments, and secure information through blockchain technology.
